This unique text presents a systematic study of a proven method for increasing the memory and reading comprehension of older adults by using a program based on discourse processing. The program facilitates the encoding and retrieval of information through a reading strategy plan utilizing top-level structures in the text. The authors of this volume provide student and teacher training manuals for the program as well as a review of the literature, data tables and graphs; an extensive bibliography; and five 1 1/2 hour sessions to improve memory and reading comprehension.
