Dirk F. Moore

**Applied Survival Analysis Using R (Use R!)** Dirk F. Moore

*Applied Survival Analysis Using R* covers the main principles of survival analysis, gives examples of how it is applied, and teaches how to put those principles to use to analyze data using R as a vehicle. Survival data, where the primary outcome is time to a specific event, arise in many areas of biomedical research, including clinical trials, epidemiological studies, and studies of animals. Many survival methods are extensions of techniques used in linear regression and categorical data, while other aspects of this field are unique to survival data. This text employs numerous actual examples to illustrate survival curve estimation, comparison of survivals of different groups, proper accounting for censoring and truncation, model variable selection, and residual analysis.

Because explaining survival analysis requires more advanced mathematics than many other statistical topics, this book is organized with basic concepts and most frequently used procedures covered in earlier chapters, with more advanced topics near the end and in the appendices. A background in basic linear regression and categorical data analysis, as well as a basic knowledge of calculus and the R system, will help the reader to fully appreciate the information presented. Examples are simple and straightforward while still illustrating key points, shedding light on the application of survival analysis in a way that is useful for graduate students, researchers, and practitioners in biostatistics.

### From reader reviews:

#### **Della Bailey:**

A lot of people always spent their free time to vacation as well as go to the outside with them loved ones or their friend. Do you realize? Many a lot of people spent that they free time just watching TV, or even playing video games all day long. If you would like try to find a new activity that's look different you can read a book. It is really fun in your case. If you enjoy the book that you read you can spent the whole day to reading a guide. The book Applied Survival Analysis Using R (Use R!) it is very good to read. There are a lot of folks that recommended this book. These folks were enjoying reading this book. When you did not have enough space to develop this book you can buy often the e-book. You can m0ore quickly to read this book from the smart phone. The price is not too costly but this book has high quality.

#### **Charles Green:**

Is it you who having spare time subsequently spend it whole day simply by watching television programs or just lying down on the bed? Do you need something totally new? This Applied Survival Analysis Using R (Use R!) can be the answer, oh how comes? The new book you know. You are and so out of date, spending your free time by reading in this brand-new era is common not a nerd activity. So what these publications have than the others?

#### **William Lee:**

Don't be worry when you are afraid that this book will certainly filled the space in your house, you may have it in e-book approach, more simple and reachable. This particular Applied Survival Analysis Using R (Use R!) can give you a lot of friends because by you checking out this one book you have thing that they don't and make you more like an interesting person. This particular book can be one of a step for you to get success. This e-book offer you information that possibly your friend doesn't realize, by knowing more than various other make you to be great folks. So , why hesitate? We need to have Applied Survival Analysis Using R (Use R!).

#### **Diane Dockins:**

What is your hobby? Have you heard that will question when you got students? We believe that that issue was given by teacher to their students. Many kinds of hobby, Every individual has different hobby. So you know that little person similar to reading or as examining become their hobby. You should know that reading is very important and book as to be the factor. Book is important thing to add you knowledge, except your teacher or lecturer. You find good news or update regarding something by book. Amount types of books that can you take to be your object. One of them is Applied Survival Analysis Using R (Use R!).
