This database, available on CD, includes loss coefficient tables for more than 200 round, rectangular, and flat oval duct fittings. Featuring pictorial outlines of each fitting, this CD is useful to design engineers dealing with a variety of duct fittings. For any given fitting, the user may enter the flow rate and fitting information and obtain loss coefficient data and associated pressure loss. The CD includes table data for supply, exhaust, and common (supply/return) duct functions, and is fully printable. Fittings may be saved into a project file, which is easily navigated using a pop-up navigation window and is small enough to be stored and transferred. Also, an "Explorer" view gives the user an integrated graphic view of all fittings and headings. This 6.00.00 version includes an integrated database; fully available input, output, calculations, and table data properties; and easily viewable calculations that update in real time.

ASHRAE, founded in 1894, is an international organization of some 50,000 persons. ASHRAE fulfills its mission of advancing heating, ventilation, air conditioning, and refrigeration to serve humanity and promote a sustainable world through research, standards writing, publishing, and continuing education.

The ASHRAE Handbooks are the design standard for control of built environments with volumes on Systems and Equipment, HVAC Applications, Refrigeration and Fundamentals. Each is updated every four years. In addition to publishing design guidance for engineers, architects, and facility managers, we also publish a series of texts for classroom use.

Some of the areas we publish in include:

- Energy Modeling and Auditing
- High Performance Building Design
- Psychrometrics
- Indoor Air Quality and Environmental Quality
- Data Center Energy Efficiency
- Noise & Vibration Control
- Humidity Control
- HVAC for Healthcare Facilities
