Luis Enrique Sucar

Probabilistic Graphical Models: Principles and Applications (Advances in Computer Vision and Pattern Recognition) Luis Enrique Sucar

This accessible text/reference provides a general introduction to probabilistic graphical models (PGMs) from an engineering perspective. The book covers the fundamentals for each of the main classes of PGMs, including representation, inference and learning principles, and reviews real-world applications for each type of model. These applications are drawn from a broad range of disciplines, highlighting the many uses of Bayesian classifiers, hidden Markov models, Bayesian networks, dynamic and temporal Bayesian networks, Markov random fields, influence diagrams, and Markov decision processes. Features: presents a unified framework encompassing all of the main classes of PGMs; describes the practical application of the different techniques; examines the latest developments in the field, covering multidimensional Bayesian classifiers, relational graphical models and causal models; provides exercises, suggestions for further reading, and ideas for research or programming projects at the end of each chapter.

From reader reviews:

Patricia Trevino:

Here thing why this specific Probabilistic Graphical Models: Principles and Applications (Advances in Computer Vision and Pattern Recognition) are different and reputable to be yours. First of all reading a book is good but it depends in the content of it which is the content is as scrumptious as food or not. Probabilistic Graphical Models: Principles and Applications (Advances in Computer Vision and Pattern Recognition) giving you information deeper and in different ways, you can find any book out there but there is no reserve that similar with Probabilistic Graphical Models: Principles and Applications (Advances in Computer Vision and Pattern Recognition). It gives you thrill studying journey, its open up your eyes about the thing that will happened in the world which is possibly can be happened around you. You can bring everywhere like in park, café, or even in your means home by train. For anyone who is having difficulties in bringing the imprinted book maybe the form of Probabilistic Graphical Models: Principles and Applications (Advances in Computer Vision and Pattern Recognition) in e-book can be your choice.

Robert Burmeister:

Reading a e-book tends to be new life style with this era globalization. With examining you can get a lot of information that will give you benefit in your life. With book everyone in this world can easily share their idea. Guides can also inspire a lot of people. Lots of author can inspire their own reader with their story or perhaps their experience. Not only the story that share in the textbooks. But also they write about the knowledge about something that you need instance. How to get the good score toefl, or how to teach your children, there are many kinds of book which exist now. The authors nowadays always try to improve their talent in writing, they also doing some investigation before they write for their book. One of them is this Probabilistic Graphical Models: Principles and Applications (Advances in Computer Vision and Pattern Recognition).

Richard Rodriguez:

Playing with family in a very park, coming to see the sea world or hanging out with pals is thing that usually you may have done when you have spare time, in that case why you don't try point that really opposite from that. A single activity that make you not sensation tired but still relaxing, trilling like on roller coaster you already been ride on and with addition info. Even you love Probabilistic Graphical Models: Principles and Applications (Advances in Computer Vision and Pattern Recognition), you may enjoy both. It is fine combination right, you still wish to miss it? What kind of hang type is it? Oh can happen its mind hangout fellas. What? Still don't have it, oh come on its identified as reading friends.

Delbert Storey:

What is your hobby? Have you heard this question when you got college students? We believe that that question was given by teacher for their students. Many kinds of hobby, Everybody has different hobby. So

you know that little person like reading or as examining become their hobby. You must know that reading is very important and book as to be the point. Book is important thing to incorporate you knowledge, except your teacher or lecturer. You find good news or update in relation to something by book. Different categories of books that can you decide to try be your object. One of them are these claims Probabilistic Graphical Models: Principles and Applications (Advances in Computer Vision and Pattern Recognition).
