Computational Methods in Plasma Physics (Chapman & Hall/CRC Computational Science)

Stephen Jardin

Computational Methods in Plasma Physics (Chapman & Hall/CRC Computational Science) Stephen Jardin

Assuming no prior knowledge of plasma physics or numerical methods, **Computational Methods in Plasma Physics** covers the computational mathematics and techniques needed to simulate magnetically confined plasmas in modern magnetic fusion experiments and future magnetic fusion reactors. Largely self-contained, the text presents the basic concepts necessary for the numerical solution of partial differential equations.

Along with discussing numerical stability and accuracy, the author explores many of the algorithms used today in enough depth so that readers can analyze their stability, efficiency, and scaling properties. He focuses on mathematical models where the plasma is treated as a conducting fluid, since this is the most mature plasma model and most applicable to experiments. The book also emphasizes toroidal confinement geometries, particularly the tokamak—a very successful configuration for confining a high-temperature plasma. Many of the basic numerical techniques presented are also appropriate for equations encountered in a higher-dimensional phase space.

One of the most challenging research areas in modern science is to develop suitable algorithms that lead to stable and accurate solutions that can span relevant time and space scales. This book provides an excellent working knowledge of the algorithms used by the plasma physics community, helping readers on their way to more advanced study.

From reader reviews:

James Bardsley:

This Computational Methods in Plasma Physics (Chapman & Hall/CRC Computational Science) book is just not ordinary book, you have it then the world is in your hands. The benefit you obtain by reading this book is actually information inside this reserve incredible fresh, you will get facts which is getting deeper an individual read a lot of information you will get. This Computational Methods in Plasma Physics (Chapman & Hall/CRC Computational Science) without we know teach the one who looking at it become critical in considering and analyzing. Don't become worry Computational Methods in Plasma Physics (Chapman & Hall/CRC Computational Science) can bring if you are and not make your handbag space or bookshelves' grow to be full because you can have it inside your lovely laptop even phone. This Computational Methods in Plasma Physics (Chapman & Hall/CRC Computational Science) having great arrangement in word and layout, so you will not feel uninterested in reading.

Michael Hamrick:

This Computational Methods in Plasma Physics (Chapman & Hall/CRC Computational Science) usually are reliable for you who want to be described as a successful person, why. The explanation of this Computational Methods in Plasma Physics (Chapman & Hall/CRC Computational Science) can be one of many great books you must have is definitely giving you more than just simple reading through food but feed you actually with information that might be will shock your preceding knowledge. This book is handy, you can bring it everywhere you go and whenever your conditions throughout the e-book and printed ones. Beside that this Computational Methods in Plasma Physics (Chapman & Hall/CRC Computational Science) giving you an enormous of experience for instance rich vocabulary, giving you tryout of critical thinking that we understand it useful in your day activity. So , let's have it and revel in reading.

Thomas Brown:

Do you like reading a reserve? Confuse to looking for your best book? Or your book seemed to be rare? Why so many problem for the book? But just about any people feel that they enjoy with regard to reading. Some people likes reading through, not only science book and also novel and Computational Methods in Plasma Physics (Chapman & Hall/CRC Computational Science) or perhaps others sources were given expertise for you. After you know how the truly great a book, you feel want to read more and more. Science e-book was created for teacher as well as students especially. Those guides are helping them to add their knowledge. In other case, beside science book, any other book likes Computational Methods in Plasma Physics (Chapman & Hall/CRC Computational Science) to make your spare time more colorful. Many types of book like here.

Jennifer David:

Reading a book make you to get more knowledge from it. You can take knowledge and information from the book. Book is created or printed or outlined from each source which filled update of news. In this modern era

like at this point, many ways to get information are available for anyone. From media social such as newspaper, magazines, science publication, encyclopedia, reference book, new and comic. You can add your understanding by that book. Are you ready to spend your spare time to spread out your book? Or just seeking the Computational Methods in Plasma Physics (Chapman & Hall/CRC Computational Science) when you necessary it?
