Computational Design Thinking: Computation Design Thinking (AD Reader) Achim Menges, Sean Ahlquist
The current transition from Computer Aided Design (CAD) to Computational Design in architecture represents a profound shift in design thinking and methods. Representation is being replaced by simulation, and the crafting of objects is moving towards the generation of integrated systems through designer-authored computational processes. While there is a particular history of such an approach in architecture, its relative newness requires the continued progression of novel modes of design thinking for the architect of the 21st century. This AD Reader establishes a foundation for such thinking. It includes multifaceted reflections and speculations on the profound influence of computational paradigms on architecture. It presents relevant principles from the domains of mathematics and computer science, developmental and evolutionary biology, system science and philosophy, establishing a discourse for computational design thinking in architecture. Rather than a merely technical approach, the book will discuss essential intellectual concepts that are fundamental not only for a discourse on computational design but also for its practice.

This anthology provides a unique collection of seminal texts by authors, who have either provided a significant starting point through which a computational approach to design has been pursued or have played a considerable role in shaping the field. An important aspect of this book is the manner in which adjacent fields and historical texts are connected. Both the source of original inspiration and scientific thought are presented alongside contemporary writings on the continually evolving computational design discourse. Emerging from the field of science, principally the subjects of morphogenesis, evolution and mathematics, selected texts provide a historical basis for a reconfigured mindset of processes that generate, arrange and describe form. Juxtaposed against more contemporary statements regarding the influence of computation on design thinking, the book offers advancements of fundamental texts to the particular purpose of establishing novel thought processes for architecture, theoretically and practically. The first reader to provide an effective framework for computational thinking in design. Includes classic texts by Johan W. von Goethe, D'Arcy Thompson, Ernst Mayr, Ludwig von Bertalanffy, Gordan Pask, Christopher Alexander, John H. Holland, Nicholas Negroponte, William Mitchell, Peter J. Bentley & David W. Corne, Sanford Kwinter, John Frazer, Kostis Terzidis, Michael Weinstock and Achim Menges Features new writing by: Mark Burry, Jane Burry, Manuel DeLanda and Peter Trummer.

From reader reviews:

Michael Durkin:

Book is to be different per grade. Book for children right up until adult are different content. To be sure that book is very important for all of us. The book Computational Design Thinking: Computation Design Thinking (AD Reader) was making you to know about other knowledge and of course you can take more information. It is quite advantages for you. The guide Computational Design Thinking: Computation Design Thinking (AD Reader) is not only giving you much more new information but also to get your friend when you experience bored. You can spend your spend time to read your publication. Try to make relationship with all the book Computational Design Thinking: Computation Design Thinking (AD Reader). You never experience lose out for everything in the event you read some books.

Jose Scott:

Spent a free time for you to be fun activity to do! A lot of people spent their leisure time with their family, or their own friends. Usually they performing activity like watching television, likely to beach, or picnic inside the park. They actually doing same every week. Do you feel it? Would you like to something different to fill your own personal free time/ holiday? Might be reading a book could be option to fill your no cost time/ holiday. The first thing that you ask may be what kinds of e-book that you should read. If you want to attempt look for book, may be the book untitled Computational Design Thinking: Computation Design Thinking (AD Reader) can be very good book to read. May be it might be best activity to you.

Gregory McCormick:

Computational Design Thinking: Computation Design Thinking (AD Reader) can be one of your starter books that are good idea. We all recommend that straight away because this e-book has good vocabulary which could increase your knowledge in vocabulary, easy to understand, bit entertaining but nonetheless delivering the information. The article author giving his/her effort to get every word into delight arrangement in writing Computational Design Thinking: Computation Design Thinking (AD Reader) but doesn't forget the main stage, giving the reader the hottest as well as based confirm resource details that maybe you can be considered one of it. This great information can drawn you into new stage of crucial pondering.

Eugene Meunier:

Reading a book being new life style in this year; every people loves to study a book. When you learn a book you can get a wide range of benefit. When you read books, you can improve your knowledge, mainly because book has a lot of information into it. The information that you will get depend on what types of book that you have read. If you want to get information about your review, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, these kinds of us novel, comics, in addition to soon. The Computational Design Thinking: Computation Design Thinking (AD Reader) offer you a new experience in reading through a book.
