DRAG: Deploying response Resources for MAS Agents using Game theory Cheng-Kuang Wu ??? Multi-agent systems applied in the event of a terrorist attack, network attack or other large-scale disaster can encounter scalability problems which generate a growing number of agents resulting in a failure to satisfy the requirements for emergency responses. This book proposes DRAG (Deploying Response MAS Agents using Game Theory) which is an integration model of noncooperative game and cooperative game, that is, to solve scalability problem and prioritize to allocate the response resources of MAS. First, the interactive actions between an external attack and a response agent are modeled as a non-cooperative game, after which the external threat value is derived from the Nash equilibrium. Second, the threat values of all response agents are utilized to compute each agent's Shapley value. Then an acceptable resources allocation of agents based on their expected marginal contribution creates a minimum set of resources deployment costs. In this book, five cases applied DRAG model to optimize MAS agent's resources for emergency responses after strong outside attacks.

From reader reviews:

Andrea Toliver:

Nowadays reading books become more and more than want or need but also get a life style. This reading habit give you lot of advantages. The huge benefits you got of course the knowledge your information inside the book that improve your knowledge and information. The information you get based on what kind of publication you read, if you want send more knowledge just go with education books but if you want experience happy read one with theme for entertaining for example comic or novel. Often the DRAG: Deploying response Resources for MAS Agents using Game theory is kind of book which is giving the reader unstable experience.

Anthony Brown:

Precisely why? Because this DRAG: Deploying response Resources for MAS Agents using Game theory is an unordinary book that the inside of the e-book waiting for you to snap it but latter it will jolt you with the secret this inside. Reading this book next to it was fantastic author who all write the book in such incredible way makes the content inside of easier to understand, entertaining approach but still convey the meaning fully. So , it is good for you for not hesitating having this ever again or you going to regret it. This amazing book will give you a lot of advantages than the other book possess such as help improving your proficiency and your critical thinking technique. So , still want to delay having that book? If I ended up you I will go to the publication store hurriedly.

Edmund Hillman:

Beside this particular DRAG: Deploying response Resources for MAS Agents using Game theory in your phone, it can give you a way to get nearer to the new knowledge or facts. The information and the knowledge you will got here is fresh through the oven so don't become worry if you feel like an old people live in narrow village. It is good thing to have DRAG: Deploying response Resources for MAS Agents using Game theory because this book offers to your account readable information. Do you often have book but you rarely get what it's interesting features of. Oh come on, that would not happen if you have this inside your hand. The Enjoyable arrangement here cannot be questionable, just like treasuring beautiful island. Use you still want to miss it? Find this book along with read it from right now!

Elizabeth Maez:

Don't be worry for anyone who is afraid that this book will probably filled the space in your house, you might have it in e-book way, more simple and reachable. That DRAG: Deploying response Resources for MAS Agents using Game theory can give you a lot of close friends because by you investigating this one book you have factor that they don't and make an individual more like an interesting person. This particular book can be one of one step for you to get success. This publication offer you information that perhaps your friend doesn't realize, by knowing more than other make you to be great folks. So , why hesitate? Let us have
