## **Period Mappings with Applications to Symplectic Complex Spaces (Lecture Notes in Mathematics)**

Tim Kirschner

Extending Griffiths' classical theory of period mappings for compact Kähler manifolds, this book develops and applies a theory of period mappings of "Hodge-de Rham type" for families of open complex manifolds. The text consists of three parts. The first part develops the theory. The second part investigates the degeneration behavior of the relative Frölicher spectral sequence associated to a submersive morphism of complex manifolds. The third part applies the preceding material to the study of irreducible symplectic complex spaces. The latter notion generalizes the idea of an irreducible symplectic manifold, dubbed an irreducible hyperkähler manifold in differential geometry, to possibly singular spaces. The three parts of the work are of independent interest, but intertwine nicely.

### **From reader reviews:**

#### **Jon McKibben:**

This Period Mappings with Applications to Symplectic Complex Spaces (Lecture Notes in Mathematics) book is simply not ordinary book, you have it then the world is in your hands. The benefit you obtain by reading this book is usually information inside this reserve incredible fresh, you will get data which is getting deeper you actually read a lot of information you will get. That Period Mappings with Applications to Symplectic Complex Spaces (Lecture Notes in Mathematics) without we recognize teach the one who examining it become critical in contemplating and analyzing. Don't end up being worry Period Mappings with Applications to Symplectic Complex Spaces (Lecture Notes in Mathematics) can bring if you are and not make your handbag space or bookshelves' turn out to be full because you can have it within your lovely laptop even mobile phone. This Period Mappings with Applications to Symplectic Complex Spaces (Lecture Notes in Mathematics) having fine arrangement in word and also layout, so you will not really feel uninterested in reading.

#### **Roger Everman:**

This book untitled Period Mappings with Applications to Symplectic Complex Spaces (Lecture Notes in Mathematics) to be one of several books in which best seller in this year, this is because when you read this guide you can get a lot of benefit onto it. You will easily to buy this specific book in the book retailer or you can order it by way of online. The publisher of the book sells the e-book too. It makes you quickly to read this book, since you can read this book in your Smartphone. So there is no reason for you to past this publication from your list.

#### **Stephanie Gilley:**

The particular book Period Mappings with Applications to Symplectic Complex Spaces (Lecture Notes in Mathematics) has a lot info on it. So when you make sure to read this book you can get a lot of benefit. The book was written by the very famous author. Tom makes some research just before write this book. This particular book very easy to read you can get the point easily after reading this book.

#### **Ruth Little:**

It is possible to spend your free time to read this book this guide. This Period Mappings with Applications to Symplectic Complex Spaces (Lecture Notes in Mathematics) is simple to develop you can read it in the playground, in the beach, train in addition to soon. If you did not have got much space to bring often the printed book, you can buy the actual e-book. It is make you better to read it. You can save typically the book in your smart phone. Therefore there are a lot of benefits that you will get when you buy this book.
