Case Studies in Biomedical Research Ethics (Basic Bioethics)

Timothy F. Murphy

Case Studies in Biomedical Research Ethics (Basic Bioethics) Timothy F. Murphy

This textbook for instruction in biomedical research ethics can also serve as a valuable reference for professionals in the field of bioethics. The 149 cases included in the book are grouped in nine chapters, each of which covers a key area of debate in the field. Some of the case studies are classics, including the famous cases of the Tuskegee Syphilis Study (in which subjects with syphilis were not given treatment) and the Willowbrook hepatitis studies (in which institutionalized subjects were intentionally exposed to hepatitis). Others focus on such current issues as human embryonic stem cell research, cloning by somatic nuclear transfer, and the design and function of institutional review boards. Each chapter begins with a brief introduction that places the issues raised in context; this is followed by a number of cases (each of which is no more than a few pages). Study questions meant to encourage further discussion follow each case. After an introductory discussion of the history and tenets of ethics in medical research, the book's chapters cover the topics of oversight and study design; informed consent; the selection of subjects; conflicts of interest; the social effects of research; embryos, fetuses, and children; genetic research; the use of animals; and authorship and publication. Following these chapters are appendixes with the texts of the Nuremberg Code and the World Declaration of Geneva, two key documents in the establishment of bioethical standards for research. Also included are a glossary, a table of cases by general category, and an alphabetical listing of cases.

From reader reviews:

Gladys James:

A lot of people always spent their own free time to vacation as well as go to the outside with them loved ones or their friend. Do you know? Many a lot of people spent they free time just watching TV, or maybe playing video games all day long. If you wish to try to find a new activity honestly, that is look different you can read a new book. It is really fun to suit your needs. If you enjoy the book that you just read you can spent 24 hours a day to reading a e-book. The book Case Studies in Biomedical Research Ethics (Basic Bioethics) it doesn't matter what good to read. There are a lot of folks that recommended this book. These were enjoying reading this book. In the event you did not have enough space to create this book you can buy the e-book. You can m0ore simply to read this book from the smart phone. The price is not too costly but this book possesses high quality.

Leroy Ange:

The reason why? Because this Case Studies in Biomedical Research Ethics (Basic Bioethics) is an unordinary book that the inside of the reserve waiting for you to snap the idea but latter it will surprise you with the secret the item inside. Reading this book alongside it was fantastic author who all write the book in such incredible way makes the content interior easier to understand, entertaining technique but still convey the meaning completely. So , it is good for you for not hesitating having this ever again or you going to regret it. This phenomenal book will give you a lot of advantages than the other book have got such as help improving your talent and your critical thinking means. So , still want to hold off having that book? If I were being you I will go to the reserve store hurriedly.

Phyllis Spencer:

Reading a book for being new life style in this calendar year; every people loves to learn a book. When you examine a book you can get a wide range of benefit. When you read textbooks, you can improve your knowledge, since book has a lot of information upon it. The information that you will get depend on what kinds of book that you have read. If you need to get information about your research, you can read education books, but if you act like you want to entertain yourself look for a fiction books, this kind of us novel, comics, along with soon. The Case Studies in Biomedical Research Ethics (Basic Bioethics) provide you with a new experience in reading through a book.

Tom Tucker:

That book can make you to feel relax. This book Case Studies in Biomedical Research Ethics (Basic Bioethics) was colourful and of course has pictures on there. As we know that book Case Studies in Biomedical Research Ethics (Basic Bioethics) has many kinds or variety. Start from kids until adolescents. For example Naruto or Detective Conan you can read and believe that you are the character on there. So , not at all of book are make you bored, any it can make you feel happy, fun and loosen up. Try to choose the best

book to suit your needs and try to like reading this.
