*Jean van Heijenoort*

**From Frege to Gödel: A Source Book in Mathematical Logic, 1879-1931 (Source Books in the History of the Sciences)** Jean van Heijenoort

Collected here in one volume are some thirty-six high quality translations into English of the most important foreign-language works in mathematical logic, as well as articles and letters by Whitehead, Russell, Norbert Weiner and Post. This book is, in effect, the record of an important chapter in the history of thought. No serious student of logic or foundations of mathematics will want to be without it. -Review of Metaphysics  
An invaluable work of reference and study. The selection of contents could hardly be bettered; those of the papers which were not originally in English have been admirably translated; and the editing of the book is impeccable in every way. -New Scientist  
This is an excellent selection of classical contributions to symbolic logic. The bringing together in English of so many important papers is in itself a major contribution; this book will long remain a standard work, essential to the study of symbolic logic. -Library Journal

### **From reader reviews:**

#### **Sylvia Dasilva:**

Book will be written, printed, or outlined for everything. You can learn everything you want by a e-book. Book has a different type. As you may know that book is important point to bring us around the world. Close to that you can your reading expertise was fluently. A guide From Frege to Gödel: A Source Book in Mathematical Logic, 1879-1931 (Source Books in the History of the Sciences) will make you to be smarter. You can feel more confidence if you can know about every little thing. But some of you think that open or reading some sort of book make you bored. It is not necessarily make you fun. Why they might be thought like that? Have you in search of best book or ideal book with you?

#### **John Sledge:**

Now a day people who Living in the era wherever everything reachable by connect to the internet and the resources included can be true or not demand people to be aware of each details they get. How people have to be smart in receiving any information nowadays? Of course the reply is reading a book. Looking at a book can help persons out of this uncertainty Information especially this From Frege to Gödel: A Source Book in Mathematical Logic, 1879-1931 (Source Books in the History of the Sciences) book since this book offers you rich facts and knowledge. Of course the information in this book hundred per-cent guarantees there is no doubt in it you may already know.

#### **Lawrence Hurst:**

Reading a book to get new life style in this season; every people loves to examine a book. When you read a book you can get a great deal of benefit. When you read ebooks, you can improve your knowledge, since book has a lot of information into it. The information that you will get depend on what sorts of book that you have read. If you need to get information about your study, you can read education books, but if you act like you want to entertain yourself you are able to a fiction books, this kind of us novel, comics, and soon. The From Frege to Gödel: A Source Book in Mathematical Logic, 1879-1931 (Source Books in the History of the Sciences) provide you with new experience in examining a book.

#### **Lynette Petree:**

Reading a book make you to get more knowledge as a result. You can take knowledge and information originating from a book. Book is prepared or printed or illustrated from each source in which filled update of news. On this modern era like now, many ways to get information are available for an individual. From media social just like newspaper, magazines, science publication, encyclopedia, reference book, new and comic. You can add your understanding by that book. Ready to spend your spare time to open your book? Or just seeking the From Frege to Gödel: A Source Book in Mathematical Logic, 1879-1931 (Source Books in the History of the Sciences) when you essential it?
