Biodiversity Planning and Design: Sustainable Practices Jack Ahern, Elizabeth Leduc, Mary Lee York, Landscape Architecture Foundation

How do you measure biodiversity, and why should landscape architects and planners care? What are the essential issues, the clearest terminology, and the most effective methods for biodiversity planning and design? How can they play a role in biodiversity conservation in a manner compatible with other goals? These are critical questions that Jack Ahern answers in this timely and useful book. Real-world case studies showcase biodiversity protection and restoration projects, both large and small, across the U.S.: the Woodland Park Zoo in Seattle, Washington; the Crosswinds Marsh Wetlands Mitigation Project in Wayne County, Michigan; the Florida Statewide Greenway System; and the Fort Devens Stormwater Project in Ayer, Massachusetts. Ahern shows how an interdisciplinary approach led by planners and designers with conservation biologists, restoration ecologists, and natural and social scientists can yield successful results and sustainable practices. Minimizing habitat loss and degradation - the principal causes of biodiversity decline - are at the heart of the planning and design processes and provide landscape architects and planners a chance to achieve their professional goals while taking a leading role in the environmental community.

From reader reviews:

Dorothy Pearce:

Now a day individuals who Living in the era everywhere everything reachable by talk with the internet and the resources within it can be true or not require people to be aware of each data they get. How people have to be smart in acquiring any information nowadays? Of course the answer then is reading a book. Reading through a book can help people out of this uncertainty Information mainly this Biodiversity Planning and Design: Sustainable Practices book since this book offers you rich details and knowledge. Of course the information in this book hundred per cent guarantees there is no doubt in it everbody knows.

Gerald Sosa:

Information is provisions for individuals to get better life, information currently can get by anyone with everywhere. The information can be a information or any news even a problem. What people must be consider when those information which is in the former life are challenging be find than now is taking seriously which one would work to believe or which one the particular resource are convinced. If you receive the unstable resource then you obtain it as your main information you will see huge disadvantage for you. All of those possibilities will not happen with you if you take Biodiversity Planning and Design: Sustainable Practices as your daily resource information.

Mary Quinn:

People live in this new moment of lifestyle always make an effort to and must have the time or they will get lots of stress from both lifestyle and work. So , once we ask do people have spare time, we will say absolutely indeed. People is human not really a robot. Then we inquire again, what kind of activity do you have when the spare time coming to you actually of course your answer will unlimited right. Then do you try this one, reading textbooks. It can be your alternative in spending your spare time, the book you have read is usually Biodiversity Planning and Design: Sustainable Practices.

Jamie Harper:

Is it you actually who having spare time in that case spend it whole day simply by watching television programs or just lying on the bed? Do you need something totally new? This Biodiversity Planning and Design: Sustainable Practices can be the reply, oh how comes? A fresh book you know. You are so out of date, spending your time by reading in this completely new era is common not a nerd activity. So what these books have than the others?
