Half Magic (Tales of Magic)

Edward Eager

Half Magic (Tales of Magic) Edward Eager

It all begins with a strange coin on a sun-warmed sidewalk.

Jane finds the coin, and because she and her siblings are having the worst, most dreadfully boring summer ever, she idly wishes something exciting would happen.

And something *does*: Her wish is granted.

Or not quite. Only half of her wish comes true.

It turns out the coin grants wishes—but only by half, so that you must wish for *twice* as much as you want.

Wishing for two times some things is a cinch, but other doubled wishes only cause twice as much trouble. What is half of twice a talking cat? Or to be half-again twice not-here? And how do you double your most heartfelt wish, the one you care about so much it has to be perfect?

Includes an introduction by Alice Hoffman
