Classical Field Theory (Dover Books on Physics)

Davison E. Soper, Physics

Classical Field Theory (Dover Books on Physics) Davison E. Soper, Physics

This text concerns continuum mechanics, electrodynamics and the mechanics of electrically polarized media, and gravity. Geared toward advanced undergraduates and graduate students, it offers an accessible approach that formulates theories according to the principle of least action. The chief advantage of this formulation is its simplicity and ease, making the physical content of classical subjects available to students of physics in a concise form.

Author Davison E. Soper, a Professor of Physics at the University of Oregon, intended this treatment as a primary text for courses in classical field theory as well as a supplement for courses in classical mechanics or classical electrodynamics. Topics include fields and transformation laws, the principle of stationary action, general features of classical field theory, the mechanics of fluids and elastic solids, special types of solids, nonrelativistic approximations, and the electromagnetic field. Additional subjects include electromagnetically polarized materials, gravity, momentum conservation in general relativity, and dissipative processes.

From reader reviews:

June Edwards:

What do you consider book? It is just for students since they are still students or this for all people in the world, the particular best subject for that? Simply you can be answered for that issue above. Every person has different personality and hobby for every single other. Don't to be forced someone or something that they don't want do that. You must know how great along with important the book Classical Field Theory (Dover Books on Physics). All type of book could you see on many methods. You can look for the internet sources or other social media.

Florence Booth:

People live in this new day of lifestyle always aim to and must have the spare time or they will get great deal of stress from both lifestyle and work. So , if we ask do people have spare time, we will say absolutely without a doubt. People is human not really a robot. Then we question again, what kind of activity do you possess when the spare time coming to an individual of course your answer can unlimited right. Then do you ever try this one, reading textbooks. It can be your alternative with spending your spare time, often the book you have read is actually Classical Field Theory (Dover Books on Physics).

Margaret Soto:

In this period globalization it is important to someone to receive information. The information will make anyone to understand the condition of the world. The condition of the world makes the information easier to share. You can find a lot of referrals to get information example: internet, newspaper, book, and soon. You can view that now, a lot of publisher in which print many kinds of book. The actual book that recommended to your account is Classical Field Theory (Dover Books on Physics) this reserve consist a lot of the information on the condition of this world now. This kind of book was represented just how can the world has grown up. The language styles that writer use for explain it is easy to understand. Typically the writer made some study when he makes this book. That is why this book acceptable all of you.

Katie Johnson:

A number of people said that they feel bored when they reading a reserve. They are directly felt the idea when they get a half elements of the book. You can choose the actual book Classical Field Theory (Dover Books on Physics) to make your own personal reading is interesting. Your current skill of reading proficiency is developing when you similar to reading. Try to choose straightforward book to make you enjoy to study it and mingle the opinion about book and reading especially. It is to be initial opinion for you to like to available a book and examine it. Beside that the e-book Classical Field Theory (Dover Books on Physics) can to be your new friend when you're experience alone and confuse in what must you're doing of their time.
