**Electromagnetism (Manchester Physics Series)** I. S. Grant, W. R. Phillips

The Manchester Physics Series General Editors: D. J. Sandiford; F. Mandl; A. C. Phillips Department of Physics and Astronomy, University of Manchester Properties of Matter B. H. Flowers and E. Mendoza Optics Second Edition F. G. Smith and J. H. Thomson Statistical Physics Second Edition F. Mandl Electromagnetism Second Edition I. S. Grant and W. R. Phillips Statistics R. J. Barlow Solid State Physics Second Edition J. R. Hook and H. E. Hall Quantum Mechanics F. Mandl Particle Physics Second Edition B. R. Martin and G. Shaw the Physics of Stars Second Edition A. C. Phillips Computing for Scientists R. J. Barlow and A. R. Barnett Electromagnetism, Second Edition is suitable for a first course in electromagnetism, whilst also covering many topics frequently encountered in later courses. The material has been carefully arranged and allows for flexibility in its use for courses of different length and structure. A knowledge of calculus and an elementary knowledge of vectors is assumed, but the mathematical properties of the differential vector operators are described in sufficient detail for an introductory course, and their physical significance in the context of electromagnetism is emphasised. In this Second Edition the authors give a fuller treatment of circuit analysis and include a discussion of the dispersion of electromagnetic waves. Electromagnetism, Second Edition features:

- The application of the laws of electromagnetism to practical problems such as the behaviour of antennas, transmission lines and transformers.
- Sets of problems at the end of each chapter to help student understanding, with hints and solutions to the problems given at the end of the book.
- Optional "starred" sections containing more specialised and advanced material for the more ambitious reader.
- An Appendix with a thorough discussion of electromagnetic standards and units.

Recommended by many institutions. Electromagnetism. Second Edition has also been adopted by the Open University as the course book for its third level course on electromagnetism.

### **From reader reviews:**

#### **Leticia Brewster:**

Often the book Electromagnetism (Manchester Physics Series) has a lot info on it. So when you make sure to read this book you can get a lot of advantage. The book was published by the very famous author. Mcdougal makes some research previous to write this book. This specific book very easy to read you may get the point easily after reading this book.

#### **Amanda Moberly:**

Do you have something that that suits you such as book? The reserve lovers usually prefer to choose book like comic, short story and the biggest some may be novel. Now, why not attempting Electromagnetism (Manchester Physics Series) that give your fun preference will be satisfied by means of reading this book. Reading addiction all over the world can be said as the means for people to know world a great deal better then how they react in the direction of the world. It can't be mentioned constantly that reading habit only for the geeky man or woman but for all of you who wants to possibly be success person. So , for every you who want to start looking at as your good habit, you are able to pick Electromagnetism (Manchester Physics Series) become your current starter.

#### **Robert Long:**

This Electromagnetism (Manchester Physics Series) is great e-book for you because the content and that is full of information for you who also always deal with world and get to make decision every minute. This book reveal it facts accurately using great organize word or we can say no rambling sentences inside it. So if you are read the item hurriedly you can have whole data in it. Doesn't mean it only gives you straight forward sentences but hard core information with wonderful delivering sentences. Having Electromagnetism (Manchester Physics Series) in your hand like obtaining the world in your arm, information in it is not ridiculous 1. We can say that no publication that offer you world with ten or fifteen minute right but this book already do that. So , this is certainly good reading book. Hi Mr. and Mrs. hectic do you still doubt in which?

#### **Tania Hansen:**

On this era which is the greater person or who has ability in doing something more are more valuable than other. Do you want to become one among it? It is just simple strategy to have that. What you should do is just spending your time very little but quite enough to possess a look at some books. On the list of books in the top record in your reading list will be Electromagnetism (Manchester Physics Series). This book which can be qualified as The Hungry Hillside can get you closer in becoming precious person. By looking up and review this e-book you can get many advantages.
