Anatomy for Anaesthetists

Harold Ellis, Andrew Lawson

Anatomy for Anaesthetists Harold Ellis, Andrew Lawson

First published in 1963, *Anatomy for Anaesthetists* is the definitive anatomy text for anaesthetists in training and remains an invaluable reference for those in practice. The text explores in depth those areas of particular interest to anaesthetists: the respiratory pathway, the heart, the vertebral canal and its contents, the peripheral nerves, the autonomic nervous system, and the cranial nerves, and also includes sections on the anatomy of pain and other zones of anaesthetic interest.

This new 9th edition has been fully revised and updated to incorporate developments in regional techniques and the increased use of ultrasound.
