Refuting the External World Goran Backlund

This piece of philosophy will guide you through every step of the way in dismantling the notion of the external world. It will effectively reveal and dispel any wrong-thinking surrounding this idea upon which all else stands. The purpose? To unburden you from all notions of 'self', allowing you to directly discover the raw, non-dual truth of Being.

This isn't the first work that tackles this subject. But others have left it at "we can't really know whether there's anything beyond our experience", while I go all the way and say that we can know – and in this book I'll show you exactly how and why this idea of an objective, physical universe of time and space beyond our perceptions is nothing but a figment of our imagination.

But it's a book unlike all others on the contemporary non-dual awakening scene. You won't find any 'pointers' in it. What you'll find is stone cold logic hacking away at the very foundation of existence itself. And in its wake; when the dust finally settles; you'll recognize that, not only were the words of the sages true all along, but they've gone from being a remote possibility to being the light and guiding principle of your life. What words?

"Consciousness is all."
