Darwin's God: Evolution and the Problem of Evil

Cornelius G. Hunter

Darwin's God: Evolution and the Problem of Evil Cornelius G. Hunter

Joining the ranks of Philip Johnson and Michael Behe, Cornelius G. Hunter gives us *Darwin's God: Evolution and the Problem of Evil*, the latest must-read installment of scholarship on human origins. Beginning with the provocative statement that "evolution is neither atheism in disguise nor is it merely science at work," Hunter denies evolution's claim to be pure science, beyond the "entanglements" of faith or belief. Ultimately, he shows how Darwin's theological concerns—particularly his inability to reconcile a loving, all-powerful God with the cruelty, waste, and quandaries of nature—led him to develop the theory of evolution.

Hunter provides the crucial key to engaging the intelligent design debate in the context of modern theology. He addresses the influences of Milton, rationalism, the enlightenment, and Deism, quoting extensively from Darwin's journals, letters, and scientific writings. Readers of history, science, philosophy, and theology will enjoy this honest telling of a complex and engrossing story.
